

# Easy Surefire Guaranteed System To Win Every Time At Online Blackjack

(only system in the world based on human greed)

[WWW.DEALPLAYWIN.COM](http://WWW.DEALPLAYWIN.COM)

Hello fellow online blackjack player. My name is not important and I want to remain anonymous. I do want to give you this amazing life changing information for free! If you are like me you are sick and tired of losing at online blackjack time and time again. From today on you can start winning at online blackjack! I feel that if I can help you down, the road karma will come back and help in some way so everyone wins. This system will work for people living all over the world, even the United States. I invented this system out of complete financial desperation. After years of tweaking, I finally have put together what you are reading now, I hope you enjoy and take advantage of it. Please share this eBook with your friends and family, put it for download on your website and file sharing programs etc. Do this and good karma will come back to you as well.

Have you ever dreamed of making a fortune by winning at online blackjack? If you are like me I sure you have. I also know like me you probably have tried and bought almost every "Guaranteed System" for winning at online blackjack under the sun and found out that they were all full of crap and all failed. ***I have found an easy surefire guaranteed way to make bucket loads of cash from winning at online blackjack.*** Yes it is true and I am making a small fortune every month using the exact system described in this eBook. Imagine what you could do with an extra \$1000 or \$10,000 or more a month. Pay off all you credit cards, pay off your mortgage, buy a new car, take an exotic vacation, heck why not do all of that! I have! I also have the peace of mind when I go to bed at night my family is financially taken care of, and that is the best feeling in the world.

What makes this system different than all the rest of the crazy blackjack systems out there is that this system has been mathematically and real life tested over a long period of time to actually work. It has nothing to do with the martingale system, negative progression, card counting, or any other crazy scheme. ***What makes this system work is human greed,*** and that is an extremely powerful emotion. I bet you have never heard of a blackjack system based on human greed before have you?

First I will tell you the step by step instructions of this amazing system, and then I will explain to you how and why everything works. For this system to work you must follow it ***exactly*** step by step. You must also have ***extreme discipline*** not to lose you profits by wavering from the system and start playing crazy. The system is very simple so let's get started.

## The System

**Step #1>** Go to [www.dealplaywin.com](http://www.dealplaywin.com) and download and install the casino software. Then sign up for a real player account.

**Step # 2>** Log into the casino software you just installed on your computer and **deposit at least \$250, the more the better.** There is an automatic 100% matching bonus up to \$999 on first time depositors. I recommend depositing \$999 to take full advantage of the automatic 100% matching bonus, but you can get started with \$250. In rare occasions some credit cards will get declined for many different reasons. If this happens just use other payment options they have, the wire transfer always works, even for US players.

**Step #3>** **Start up the blackjack session** by clicking on the blackjack icon, then select "Private Table," then "Be The Player," then check the box where it says "Play against human dealer when available." Lastly click "Standard" for the minimum betting.

**Step #4>** Start playing by betting \$5 every bet, **never more, never less, always bet the same \$5 win or lose!** When playing follow the attached basic blackjack strategy guide chart on the last page, do not waiver from its instruction! Do this for 200 bets.

**Step #5>** **(This is where you start making big money)** Now log out and start up the blackjack session again by clicking on the blackjack icon, then select "Private Table." This time instead of selecting "Be The Player," select "Be The Dealer," then "Standard," for the minimum betting. Lastly once you are at the table check the "auto" box.

**Step #6>** **Repeat steps 4 and 5 over, and over, and over, again!**

## The System Explained

**Step #1>** This is the only casino where this system will work and you can be the dealer.

**Step # 2>** The more money you deposit, the bigger the matching bonus you get for free.

**Step #3>** This step is integrated with step 4. I tell you to play against human dealers because them more human dealers the better for everyone. Even if there are no human dealers available you will automatically play against the computer and it will not affect the system, it will work exactly the same.

**Step #4>** Here you are accumulating "dealer points." You get 1 dealer point for every dollar you bet. The minimum bet is \$2 but it takes too long to accumulate dealer points playing \$2 per bet. At \$5 per bet you can accumulate dealer points fairly quickly without risking a lot of money per bet. You can bet more if you want to accumulate dealer points faster but **always bet the same amount every bet win or lose!** You should accumulate a minimum of 1000 dealer points before continuing on to step 5. Now here comes the math

part so you may need to reread this part a couple times. By following the basic blackjack strategy guide the house will have an edge of just less than 1%. This is a fact; you can look up "what is the house edge in blackjack" on Google yourself. By betting \$5 for 200 bets that is \$1000 in bets. You will lose 1% (house edge) of that \$1000 which is \$10. If you made an original deposit of \$250 and received a house bonus of \$250 you will have started with \$500. Now take out your losses of \$10 out and you are left with \$490. Most importantly you now have 1000 dealer points. You need at least \$400 and 400 dealer points to continue on to step 5.

**Step #5> *This is where the magic happens.*** This is when you get to be the dealer. Other humans will be betting against you. And guess what? They do not follow the basic strategy guide. They will try all those other crazy systems you and I have tried before. They will try the martingale system, negative progression, card counting, or some other crazy system. They will lose all their money by trying all these crazy systems. ***They will get greedy while you will sit back and rake in the cash when they do try these crazy systems that all fail.*** Most people will lose all their money in one session. They will chase their losses trying to get even. We have all been there before. But now you can just sit back and relax as the money comes pouring in. For every \$1 someone bets you will use up 1 dealer point. Most times you will start playing right away; however there are times when you will have to wait as the dealer for a human player to play against you. That's why I tell you to check the "auto" box. You do not have to be at the computer when some is playing against you. Then you can just walk away from the computer and come back later and check out how much money you have made.

**Step #6>** Once you are down to 400 dealer points you will have to repeat step 4 to accumulate more dealer points again then go on to step 5.

## Conclusion

Now do you see why this system is so different from all the rest of the ones you have seen out there? Please remember to follow the system exactly and have extreme discipline not to waiver from it otherwise you will lose your profits. Do not try playing as the dealer at the higher limit tables or public tables where there is more than one player. You can win a huge amount of money in a short amount of time as the dealer while doing this but it comes with great risk. If you are the dealer at the higher limit tables or public tables with more than one player and you bust out a few times in a row as the dealer you can lose a ton of money. By playing at the smallest limit private tables you will not have this problem.
